

Intelligence, Surveillance, Reconnaissance Battle Management

*Exploring new battle management technologies,
processes and procedures supporting
joint force objectives through the
Combined Air Operations Center ISR Division*

Allows total ISR sensor integration and synchronization

- National, theater and tactical asset use and data requirements fused
- More effective battlespace monitoring and resource allocation

Enables superior battlespace awareness and understanding

- Reduces operational uncertainty; helps clear friendly "fog of war"
- Lowers combat operational risk and cost; enables deliberate action

Ensures the best visualization of the battlespace

- Enhancing tactical planning and force protection
- Available to all commanders across all phases of combat operations

OPTIMIZING MANAGEMENT OF LIMITED ISR RESOURCES
