

What's come out of JEFX?

JEFX is creating an environment of exploration and investigation that provides insight into the next Revolution in Military Affairs. JEFX provides a venue to:

Validate operational concepts ■ Evaluate new technologies ■ Identify and prove worth of new ideas

PROCESSES

Providing improved warfighting processes

- Air Operations Center (AOC) as a weapon system

- Time Critical Targeting (TCT) techniques

- Distributed collaborative operations
- Integrated space into AOC operations
- Reduced forward footprint

- Information Management
- Integrated Logistics
- Reduced Air Tasking Order cycle
- ... and more

SYSTEMS

Improving, transitioning and fielding warfighting systems

- Theater Battle Management / Space Battle Management Control Systems (TBMCS/SBMCS) applications

- Integrated Defensive Avionics System / Multi-mission Advanced Tactical Terminal (IDAS/MATT)

- Broadsword / Command and Control Link

- AWACS Broadcast Intelligence

- Rapid Precision Targeting System

- Collaborative Tools

- Agile Combat Support Integrated Logistics command and control

- Target Prioritization Tools
- Time Phased Force Deployment Document in an Hour
- Information Assurance

- Beddown Capability Assessment Tool / Survey Tool for Employment Planning (BCAT/STEP)

- Joint Targeting Workstation / Tactical Fusion Prototype (JTW/TFP)

- B-2 Command and Control for Rapid Halt (B-2 C2)

- Remote In-transit Visibility (RITV)
- Theater Weather Services (TWS)
- Information for Global Reach (IFGR)

- Global Air Mobility Operational Display (GAMOD)

- Command and Control Information Planning System (C2IPS)

- Dynamic Information Gateway Management System (DIGMAS) ...and more

NETWORKS

Providing improved warfighting communications

- New techniques, tools and procedures

- Multi-Level Secure Information Transfer

- Network Management

- Information Assurance

- Data links

- ... and more

KNOWLEDGE FOR INFORMED DECISIONS TO INFLUENCE THE MODERNIZATION PROCESS
