

What is the Joint Expeditionary Force Experiment?

JEFX is a biennial Air Force experiment combining live-fly and simulation in a realistic, simultaneous warfighting environment in which warriors evaluate new operational concepts and technologies. New processes and leading-edge technologies are rapidly evolved and matured for application in the Expeditionary Aerospace Force.

INCREASED **CAPABILITY** for the Expeditionary Aerospace Force of the 21st Century

Integrated Total Force

Tailored Forces

Self-Sustaining Combat Support

Rapidly Deployable

Light, Lean, Lethal, Decisive

Aerospace Power

DYNAMIC, RESPONSIVE COMMAND & CONTROL
