

Intelligence, Surveillance & Reconnaissance (ISR) in JEFX '02 – A Joint Warfighting Enabler

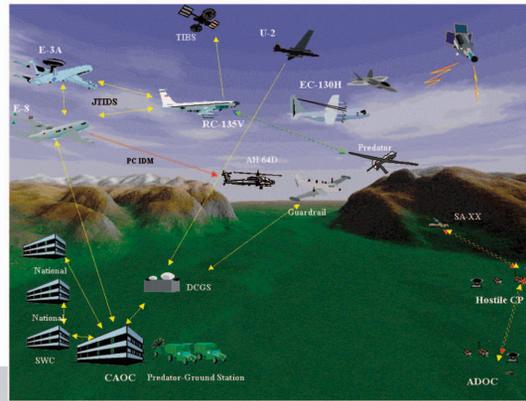

Advanced capabilities = Improved Effects-Based Operations

PBA

- Refine the science of prediction
- Integrate ISR functions into a common framework in order to maximize ISR capabilities
- Visualize and dynamically manage ISR assets
- Integrate Distributed Common Ground Station (DCGS) into Joint Air Operations Center

PROJECT SUTER II

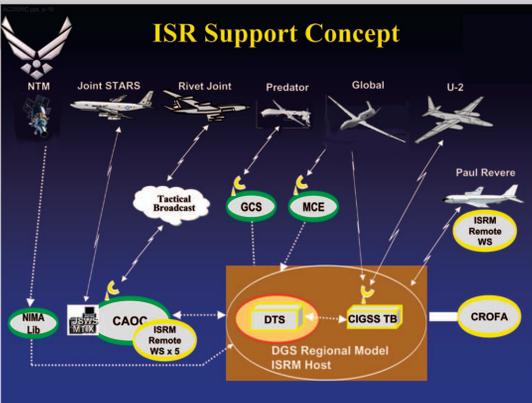

- Improved dynamic management of ISR, Space and Information Warfare operations to develop high-fidelity Time Critical Targeting and engagement operations
- Drive significant improvements in Air Force and Joint warfighting capabilities using new processes and technologies

EFFECTS-BASED OPS

- Create the desired effect on the battlespace (2007 timeframe)

ISR Support Concept

ISR MANAGEMENT

- ISR Management (ISR-M)
- Joint Targeting Tool Kit (JTT)
- Collection Management Mission Applications (CMMA)

INNOVATION
